Notice Concerning Issuance of MDV Group Integrated Report
"Integrated Report 2024" (English)

Medical Data Vision announces that it has issued its first integrated report, "Integrated Report 2024."

In this report, we aim to explain MDV Group's efforts to create sustainable value by integrating financial and non-financial information and communicating this information to our shareholders, investors and other stakeholders in an even easier-to-understand manner.

We have clarified our initiatives related to materiality (key issues) as the foundation to support sustainability, such as responding to climate-change and promoting DE&I. Through this report, we will introduce initiatives aimed at value creation, such as resolving social and environmental issues, in an easy-to-understand manner. At the same time, we will promote initiatives aimed at further enhancing corporate value while utilizing them as a tool for dialogue with shareholders, investors, and other stakeholders.

Integrated Report 2024
