Business Report

(April 1, 2017 through December 31, 2017)

The Company has changed its fiscal-year end which used to be March 31 to December by obtaining the approval in the Annual Ordinary General Meeting of Shareholders held on June 28, 2017.

For this reason, this consolidated financial year is transitional period, and the Company, and Consolidated Subsidiaries the end of fiscal year of which is March, irregularly settled the accounts with nine months period from April 1 to December, 2017. Also, for the purpose of comparison to the last year, the financial figures of the same period in the last fiscal year resulted from consolidation of the profit and loss of the Company and Subsidiary for 9 months are used. The financial figures of the same period of last fiscal year are reference figures which are not audited.

1. Present Status of the Corporate Group

(1) Status of Business for the Current Consolidated Business Year

The Japanese economy for this consolidated fiscal year gradually recovered by the steady demand of overseas due to the expansion of global economy, and also improvement of domestic demand by recovery of domestic consumption due to rising stock market, and robust housing investment because interest rates continue to be low. As for global economy, employment index and corporate performance in North America remains steady and China and developing countries such as ASEAN, in general, showed steady movement.

Looking at the car industry to which this Company belongs, the volume of domestic car production increased compared to the same period of last year as a repercussion to the discontinuation of car production caused by the earthquake in Kumamoto prefecture in 2016. Looking at ASEAN, the total car production in the three ASEAN countries increased compared to the same period of last year because of the recovery from consumers sentiment of hesitating of buying after the decease of the King of Thailand. The trend of car production in Indonesia was same as the same period of last year, but decreased in Malaysia compared to the same period of last year due to poor domestic car sales. As for China, car production increased compared to the same period of last year supported by the steady economy in China.

Under those circumstances, both the revenue and the profit increased compared to the same period of last year, mainly owing to the growth in orders received in Japan and performance recovery of overseas affiliated companies in ASEAN. On the other hand, additional loss on valuation is recorded because the method of inventory assessment was partially revised as a result of the Company's becoming a consolidated Subsidiary

of Valeo. As a result, the revenue was 94,070 million yen (same period of last year 82,144, 14.5% increase compared to the same period of last year), operating income was 3,971 million yen (same period of last year 2,721 million yen, 45.9% increase compared to the same period of last year), ordinary income was 4,660 million yen (same period of last year 3,061 million yen, 52.2% increase compared to the same period of last year), and net income attributable to parent company shareholders was 3,792 million yen (same period of last year 3,536 million yen, 7.2% increase compared to the same period of last year).

With respect to the results by each segment for Automotive-Parts business, the revenue and profit has increased mainly due to the steady increase of orders received in Japan and the performance recovery of overseas affiliated companies in ASEAN. The revenue was 87,318 million yen (same period of last year 75,905 million yen, 15.0% increase compared to the same period of last year) and operating income was 4,201 million yen (same period of last year 2,838 million yen, 48.0% increase compared to the same period of last year).

For After-Market business, the revenue was 6,411 million yen (same period of last year 5,934 million yen 8.0% increase compared to the same period of last year), operating loss was 259 million yen (same period of last year operating loss of 137 million yen).

For other business, the revenue was 1,551 million yen (same period of last year 1,403 million yen, 10.5% increase compared to the same period of last year) and operating income was 38 million yen (same period of last year operating loss of 1 million yen).

Regarding the dividends, considering that returning profits to shareholders is an important management issue, stable and continuous distribution of dividends with a view to long-term prospects is our basic policy.

Regarding dividends for the fiscal year ending December 2017, the interim dividends was 2.50 yen per share, and for the 3 months period of Oct.1 to Dec.31, 2017, the year-end dividend is 1.5 per share, which makes the annual dividends 4 yen.

#### (9) Challenges Facing Ichikoh

The Mission of our Company group is “Reflect and Shine: Create a driving environment that feels safe, offers more protection, and provides more comfort,” and the Vision is to “continuously endeavor to become a corporation that satisfies both customers and society by pioneering the frontiers of technology and supplying optimal solutions which being ecologically minded.”

Given the prospects of the volume of automobile production, which is the market of our Company group, the domestic market tend to be reaching the limit due to the declining birthrate and aging society, and the expectation of demand increase due to increased production volume comes from China and ASEAN. Under the circumstances, in Japan, we will utilize our high technology development capabilities and seek to grow by increasing added value such as use of LED (light emitting diode) as light source and replacing cameras with mirrors. Meanwhile, in overseas such as ASEAN and China, the Company group's growth strategy is to capture the demand, including that comes from increased production volume, while taking advantage of the high level technical expertise cultivated in Japan.

Recently, the functions required for automotive parts such as those required from the progress of automatic driving technology are becoming more diversified, and it seems that big changes will happen at a faster speed than ever before. Among them, the bipolarization of components with high added value and low cost is expected to progress further, and thus we need to speed up the pace not only for research and development of products, but also for development of manufacturing technology for low cost production.

In order to carry out these growth strategies and deal with the issues, we will utilize collaboration with Valeo, our parent company, to jointly develop new products such as electronic mirrors and products responding to automatic driving, and to reduce cost from joint procurement and joint research, taking full advantage of scale merit, and we are acquiring additional market share in the global market through aggressive marketing activities, expanding our customer base and strengthening geographical complementary relationship.

In addition, by establishing and operating the internal control system to secure credibility of our financial statements and to structure the risk management system and to eliminate the conflict of interest, the company will improve compliance awareness of all people engaging in the business of our Company group to fulfill our social responsibility as a corporation.

We would appreciate your continuing support and cooperation as shareholders.
