Basic Views on Corporate Governance, Capital Structure, Corporate Attributes and Other Basic Information

1. Basic Views

The Company strives to continuously improve its corporate value by building and maintaining relationships of trust with its stakeholders that support it. To achieve this, it is essential to ensure sound, efficient, and transparent management, and the Company regards the enhancement of corporate governance as an important management issue.

For details on the Company's governance structure based on this basic policy, please refer to “II-2. Matters Related to Functions of Business Execution, Audit and Supervision, Nomination, Remuneration Decisions, etc. (Overview of Current Corporate Governance Structure)” in this Report.

[Reasons for Not Implementing the Principles of Japan's Corporate Governance Code]

The information is based on the revised Code of June 2021.
(Includes principles applicable to the Prime Market since April 2022.)

[Principle 1.4] (Cross-Shareholdings)

<Policy on cross-shareholdings>

The Company holds shares of business partners that contribute to the enhancement of corporate value over the medium- to long-term, including the continuation of good business relationships and the building of long-term relationships of trust, as cross-shareholdings. The Board of Directors determines the appropriateness of holding such shareholdings at least once a year by comprehensively reviewing the purpose of holding each individual stock, transaction status, share price, dividend amount, etc. Periodic and ongoing verification will continue to be conducted to review the necessity of holding or selling shares.

<Criteria for exercising voting rights pertaining to cross-shareholdings>

With respect to the exercise of voting rights in cross-shareholdings, the Company carefully examines the management policies, business performance, and other aspects of the companies in which the shares are held, as well as the content of proposals, and determines whether the exercise contributes to the enhancement of shareholder value over the medium- to long-term.

[Disclosure Based on the Principles of Japan's Corporate Governance Code]

Updated

[Principle 1.7] (Related Party Transactions)

The Company conducts periodic investigations of transactions between the Company and its Directors and their immediate families regarding the existence of such transactions. The approval of the Board of Directors is required for any self-dealing, conflict-of-interest transactions, or any other important transactions engaged into by Directors, and such transactions must be reported to the Board of Directors without delay after the transaction to confirm its rationality and appropriateness so that the transaction will not harm the interests of the Group or the common interests of its shareholders.

In addition, transactions with related parties are disclosed in annual financial statements and other documents in accordance with laws and regulations.

[Supplementary Principle 2.4.1] (Ensuring Diversity)

The Company aims to propose products, systems, and solutions that exceed customers' expectations with imaging technology at the core. A medium-term human resource development policy has been formulated in which, “We will develop human resources with more flexible thinking and practical skills to respond to the age of VUCA, based on the development of diverse human resources who can ‘create’ and ‘support’ the next business model amid the increasing sophistication and complexity of manufacturing.”

Regarding the promotion of females to management positions, the Company aims to achieve a 7% ratio of female managers in Japan by 2025. To promote activities of female employees, the Company is working to create an environment in which women can balance work and family life, and is promoting initiatives such as the establishment of leaves of absence and shortened working hours. In Japan, measures are being promoted such as reinforcing the recruitment of female employees, appointing women to leadership positions, and enhancing training systems, including career design training for female employees, which will lead to achieving the target ratio of female managers.

[Current ratio of female managers: 4 managers/3.7% in Japan, 20 managers/21.3% overseas]

Targets have not been set for the appointment of foreign nationals to management positions.

The Group consists of 18 companies around the world, including Japan, Germany, China, and the U.S., with employees representing 36 nationalities. The Company's idea is that human rights of each individual should be respected rather than numerical targets, and that appropriate personnel should be appointed as managers based on a fair evaluation of their abilities. In principle, top management of group companies in each country is staffed by local personnel, and we strive to create a suitable work environment while taking advantage of the diversity of situations, cultures, and customs in each country in our economic activities.

[Current status of promotion of foreign nationals to management positions: 2 managers/1.8% in Japan]

There is also a policy of fairly evaluating and appointing suitable mid-career hires, and there is no set numerical targets for management positions.

[Current status of promotion of mid-career hires to management positions: 47 managers/43.1% in Japan]

Details of the above-mentioned initiatives are available on the Company's website.

The specific amount of stock-based remuneration shall be calculated based on the points stipulated in the internal rules for each position of executive Directors who are eligible for payment. The timing of the granting of stock-based remuneration shall be determined by a resolution of the Board of Directors after the Ordinary General Meeting of Shareholders following the end of the fiscal year. Directors who have been granted shares of stock shall not transfer, grant a security interest in, or otherwise dispose of such shares until they retire from their positions as officers or employees of the Company or its group companies, as previously determined by the Board of Directors.

- d. Policy on determining the ratio of the amounts of fixed remuneration, performance-linked remuneration, and stock-based remuneration to the amount of remuneration, etc. for individual Directors

The Board of Directors will determine the appropriate allocation of stock-based remuneration as long-term incentive remuneration. The specific calculation method of the amount of performance-linked remuneration and the amount of stock-based remuneration is as described in c. above. Depending on performance, the ratio of performance-linked remuneration to the total amount of fixed remuneration, performance-linked remuneration and stock-based remuneration (total amount of remuneration) generally ranges from 0% to 50%, and the ratio of stock-based remuneration to the total amount of remuneration generally ranges from 0% to 25%.
