Business Strategies and Business Plans

Management Strategy

Amid large changes in the business environment, the Group released our five-year medium-term management plan covering Fiscal Year 2022 through Fiscal Year 2026. To polish our expert capabilities, the unique strength of the Group, to promote the low-carbonization and zero-carbonization of our company and society heading toward 2050, and to realize our long-term management vision of balancing these goals with earnings growth, we have clarified the policies that we will implement in the coming five years in our medium-term management plan. We are moving forward with support for the energy infrastructure changeover parallel to the transition to fleets composed of ships using alternative fuels. Simultaneously, to ensure that we capture these business opportunities and to enhance our profitability and growth potential, we are working to enhance our corporate value sustainably by concentrating our management resources and strengthening our partnerships with our customers. To realize these initiatives, we are executing our business strategies, building our business foundation, and clarifying our capital policy.

We have established the following management indices and goals to quantitatively manage our initiatives to enhance corporate value.

Management Index	Targets FY 2026
ROE	10%+
ROIC	6.0% ~ 7.0%
Income	Ordinary income: ¥140 billion (Steady progress is being made with regard to the income target in light of target figures according to the management index, and in light of growth results, the income target will be worked on with a view to achieving ordinary income of ¥140 billion, which is the target in the medium-term management plan, ahead of schedule.)
Optimal capital structure	Balancing the optimization of our capital efficiency as a group with sound finances that allow strategic fundraising
Shareholder returns policy	Set the cumulative amount of shareholders returns, the scope of which was set from a minimum of ¥400 billion to a maximum of ¥500 billion during the term of the medium-term management plan, to a minimum of ¥500 billion or more due to an upward swing in operating cash flow. (Focus on both capital efficiency and financial soundness through cash allocation with an awareness of optimal capital, and enhance corporate value by carrying out proactive shareholder returns after making investments for growth.)

Medium-Term Management Plan

1. Formulating a long-term management vision for growth leveraging the environment

We have formulated a long-term management vision that we would like to realize through activities aimed at strengthening portfolio management and low-carbonization and zero-carbonization.

To polish our expert capabilities, the unique strength of the Group, and to balance contributing to the low-carbonization and zero-carbonization of the Company and society with profit growth, we are concentrating our management resources in businesses that play a role in driving growth, aiming for sustainable growth as a company that is highly market resistant

with both our pillar businesses and containership business. We will implement investment with a greater awareness of capital cost and appropriate capital policy.

2. Concentrating management resources through our business portfolio strategy

Our new business portfolio framework categorizes the roles of the businesses and clarifies the strategic direction of each business according to its role.

Using the low- and zero-carbon transitions of the Company and society as an opportunity, we will achieve business growth through the concentrated allocation of management resources in the portfolio of “businesses that play a role of driving growth.” In the portfolio of “businesses that play a role of supporting a smooth energy source conversion and taking on new business opportunities,” we will strive to meet the demand for alternative fuels while minimizing business risks. In the portfolio of “businesses that play a role in contributing by enhancing profitability,” we will pursue synergies with other businesses while promoting the migration to a light-asset business model by aligning the ship ownership period with the contract period for bulk carriers, working to improve market resilience and secure stable earnings in each covered business. For these three portfolios, we will continue to consider strategic replacement of business assets.

In the portfolio of “businesses that play a role of supporting the business as a shareholder and stabilizing the earning base,” we aim to maximize corporate value through ongoing personnel support and involvement in management governance. In the “new business domain,” we will pursue Group synergies and expand the business domains in which we can leverage our strengths.

3. Building a business foundation to realize our business strategy by polishing technologies and expertise unique to the Group through our functional strategy based on our organizational and personnel plan

We will build a solid business foundation to realize our business strategy. By improving our unique technology and expertise through investment into the human resources that are the source of the Group’s value proposition as well as their supporting systems and technologies, we will enhance our organizational strength through coordination among our specialized and technological divisions and aim for sustainable growth. Furthermore, regarding the environmental and technological development and safety and ship quality management that are essential to realizing future growth, we will further strengthen our response by establishing a support system and organization through continuous initiatives and by strengthening our global locations.

4. Creating optimal capital policy at the Company and improving business management to execute that policy

We will constantly be aware of the optimal capital structure and cash flow, and focus on both capital efficiency and financial soundness. We will enhance corporate value by carrying out proactive shareholder returns after making investments for growth. Furthermore, by working to further improve business management as part of capital policy, we will strengthen and promote business portfolio management and cash flow management through the introduction of management indicators by business with an awareness of capital costs.

The management plan including the business strategies is disclosed on the Company’s website below.

- (3) The amount of remuneration for each individual Director shall be fair and adequate in consideration of the Company's business performance and in light of the levels of remuneration paid by other comparable companies.

The Board of Directors' procedures for determining remuneration for senior management and Directors are as follows.

- (1) The institutional design and level of remuneration for Directors shall be deliberated on, resolved, and recommended to the Board of Directors by the Remuneration Advisory Committee pursuant to the aforementioned policies.
- (2) The Board of Directors shall furnish its approval for the remuneration by position for members of senior management and Directors within the limit of the maximum yearly remuneration resolved at the General Meeting of Shareholders, paying heed to recommendations. Meanwhile, the Representative Director and President shall ultimately determine amounts of payment for each member of senior management and each Director.

Remuneration for Directors of the Company (limited to Executive Directors) and Executive Officers consists of three types: fixed remuneration (monetary), short-term performance-based remuneration (monetary), and medium- to long-term performance-based remuneration (stock). The payment for each type of remuneration, etc. is expected to be 100:40:65 in the case that performance targets are achieved. The base amount for each position for short-term performance-based remuneration varies within the scope of 0 to 1.5 and the base amount for each position for medium- to long-term performance-based remuneration varies within the scope of 0 to 1.8 depending on the level of achievement of targets, and the degree of linkage to performance increases in accordance with management responsibilities. The coefficient for multiplying the base amount for each position shall be linked to consolidated performance (total amount of ordinary income, amount of ordinary income excluding the containership business, and profit attributable to owners of the parent) for single fiscal years as well as individual contributions. The coefficient linked to consolidated performance varies in value from 0 to 1.5 based on the designated formula according to the level of achievement of targets. The degree of linkage to performance increases in accordance with management responsibility.
In addition to this, in the event of a serious marine accident, the Company applies subtraction indicators according to the extent of the accident and its impact.

- Medium- to long-term performance-based remuneration (stock)

The medium- to long-term performance-based remuneration (stock) shall be linked to the total shareholder return (TSR) and other indicators in order to further share value with shareholders and make the incentives for Directors to enhance corporate value over the medium- to long-term function effectively.

Note: The Company's TSR = The rate of increase of the Company's shares over a fixed period + The dividend rate over the fixed period (Total dividend ÷ Initial share price)

For TSR-based indicators, a combination of the ratio of the Company's TSR to the TOPIX growth rate (hereinafter, the "TSR Ratio") and the ranking of the Company's TSR to the TSR of other companies shall be used to determine the coefficient for multiplying the base amount for each position.

If the TSR Ratio is 50% or less, the coefficient for multiplying the base amount for each position shall be 0 (the minimum value); if the TSR Ratio is 100%, the coefficient shall be 1 (when set targets were achieved); if the TSR Ratio is 150% or more, the coefficient shall be 1.62 (the maximum value); and if the TSR Ratio is more than 50% but less than 150%, the coefficient shall be calculated through a certain formula.

Apart from TSR-based indicators, the Company introduces coefficients based on the level of achievement of the targets in the medium-term management plan and the ranking of the Company to other companies as ROE indicators, and coefficients that assess the improvements in CO₂ emissions efficiency as ESG indicators.

The degree of linkage to performance is designed to increase in accordance with management responsibility. The composition ratio for TSR indicators: ROE indicators: ESG indicators (CO₂) is set at 90:5:5.

The total values of each coefficient (the minimum value 0, the maximum value 1.8) calculated as detailed above shall be multiplied by the base amount for each position to calculate the amount of medium- to long-term performance-based remuneration, which will be converted into points and awarded to Directors each fiscal year. In principle, the Company's stock, etc. will be delivered at the time of retirement in proportion to the accumulated number of the points awarded.

To reinforce management where these issues are key objectives, the Company established the “Corporate Sustainability Management Committee” and the “GHG Reduction Strategy Committee.” The President & CEO acts as the Chairman of each committee, which is enhancing corporate value by reviewing and formulating a promotion system for “K” LINE Group’s sustainability management and a GHG reduction strategy. As organizations responsible for practical implementation, the Corporate Sustainability, Environment Management Promotion, IR, and Communication Group,

the GHG Reduction Strategy Group, the Carbon-Neutral Promotion Group, the Fuel Strategy & Procurement Group, and the Advanced Technology Group are each accelerating sustainability initiatives through their operations. The Company reviews the materiality (important sustainability issues) as necessary as a part of the process to identify, evaluate and manage sustainability-related risks and opportunities. The Company newly identified five areas and 12 items regarding material issues in the review in Fiscal Year 2022.

The 12 newly identified items regarding material issues were categorized and arranged into the five areas of “safety & quality,” “environment & technology,” “promotion of digitalization” and “human resources,” which are the four pillars of the capabilities strategy that the Company set forth in the medium-term management plan, in addition to the “management foundation,” which is the foundation for the other four areas. The Group has positioned the material issues as an important issue to be addressed in order to realize the corporate principle and vision based on the medium-term management plan.

Furthermore, the Company issues its “K” LINE REPORT and Sustainability Booklet, and provides overall information on sustainability on the sustainability and management plan page of its website, including scenario analysis based on the Task Force on Climate-Related Disclosures (“TCFD”) recommendations, investments in human capital, reduction of environmental burden, diverse workstyles, and investments in intellectual property to promote technological development and innovation initiatives to support improvement of service quality.

Implementation of Measures to Provide Incentives to Directors	Performance-based remuneration
---	--------------------------------

Supplementary Explanation [Updated]

The Company has introduced the following indicators for short-term performance-based remuneration and medium- to long-term performance-based remuneration to maximize corporate value.

Short-term performance-based remuneration:

Short-term performance-based remuneration is primarily linked to the level of achievement of the targets for consolidated performance for a single fiscal year. The Company introduced coefficients linked to the level of achievement of the targets for consolidated performance (total amount of ordinary income, amount of ordinary income excluding the containership business, and profit attributable to owners of the parent) for single fiscal years and coefficients that depend on individual contribution in addition to ESG (safety) indicators that subtract remuneration in the event of a serious marine accident.

Medium- to long-term performance-based remuneration:

Medium- to long-term performance-based remuneration (stock) is primarily linked to the total shareholder return (TSR) over the past three years in order to further share value with shareholders and increase the incentives for Directors to enhance corporate value over the medium- to long-term. In addition, the Company has adopted indicators linked to return on equity (ROE) for the past three years and indicators linked to the level of improvement of CO₂ emissions efficiency in the previous year. The composition ratio for TSR indicators: ROE indicators: ESG indicators (CO₂) has been set at 90:5:5.

Please refer to pages 52 to 53 of the Company’s 155th Annual Securities Report (Japanese only) for details on the Company’s policy for determining proportions of remuneration in the form of performance-based remuneration and remuneration other than performance-based remuneration, benchmarks pertaining to performance-based remuneration, methods of determining amounts of such performance-based remuneration, and reasons for having selected such benchmarks.
