Notice of Large Order Received

Seibu Giken Co., Ltd. ("Sebu Giken") is pleased to announce that we have received a large order for a lithium-ion battery manufacturing plant for electric vehicles ("EV"), as follows:

1. Background of the Orders

Seibu Giken has been engaged in the worldwide business of manufacturing and selling equipment and devices that are essential for the production process of lithium-ion batteries for EV (the "Process"). In recent years, domestic and overseas automakers and EV battery manufacturers strive to reduce the environmental impact throughout the Process. Seibu Giken has been proposing solutions to create optimum manufacturing environments in Japan on top of manufacturing and sales of equipment essential for the Process. Seibu Giken has received this order due to our proven track record in proposing solutions to save energy in the Process.

2. Order Details

Domestic order

Amount of order received	Approx. JPY 870 mn
Details of order received	Energy-saving heat exchange system and its design/construction works for major Japanese EV battery manufacturer
Expected delivery	Q3 2025

Please note that we are unable to disclose the customer's name, site name, the number of units sold, and other specific details of the new order recipients and end-users from the viewpoint of protecting trade secrets to the recipients and end-users. In addition, there are no capital, personal, or business relationships that should be disclosed between Seibu Giken and the order recipients. In addition, neither of them is our related parties.

3. Impact on Financial Results

The above order has no impact on Seibu Giken's financial results for the fiscal year ended December 31, 2024. Sales are expected to be recorded in Seibu Giken's consolidated net sales for the fiscal year ending December 31, 2025.

Appendix

1. About Seibu Giken

With our Purpose "Provide green air solutions for every environment," Seibu Giken develops, manufactures the desiccant dehumidifiers and VOC concentrators, etc., sells these products in more than 50 countries worldwide and provides services including installation and maintenance.

2. About the Heat Exchange System

It is a system for saving air conditioning energy during ventilation. It transfers the thermal energy contained in the exhaust contaminated air to the fresh supply air and reduces the temperature difference between the room temperature and the air supply. In response to the recent growing demand for a decarbonized society, it has been adopted as a system enabling the effective use of factory waste heat in various industries.
