### 1. Implementation of interim dividends

The Company’s basic policy is to maximize shareholder returns by securing substantial equity capital, reinforcing a sound financial base, and pursuing improved capital efficiency. Under this basic policy, the Company aims to keep stable dividend payments, with a dividend payout ratio of around 30% in the mid and long term. In addition, the Company has been working to deliver shareholder returns with the aim of paying out progressive dividends, in order to achieve a management style that is conscious of capital costs and stock prices. Until the fiscal year ended March 31, 2024, dividends from surplus were paid once a year as a year-end dividends. However, in order to further increase the opportunities to return profits to shareholders based on the above policy, the Company will pay out interim dividends, appropriating surplus twice a year as interim dividends and year-end dividends.

The Company’s Articles of Incorporation stipulates that it may pay out interim dividends by a resolution of the Board of Directors, with the record date being September 30 every year.
