

August 29, 2024

To all persons concerned:

NPC Incorporated  
1-7-15 Higashi-ueno, Taito-ku  
Tokyo 110-0015, Japan

## **Announcement of Change in Reporting Business Segments**

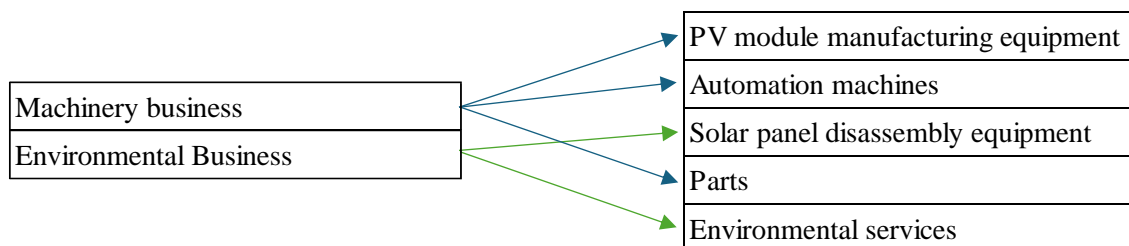

NPC incorporated (“the Company”) hereby announces that the Company has decided to make a change in its business segments for financial reporting, as resolved at the Director’s Board of Meeting held on August 29, 2024.

### **1. Details and reasons for the change**

The Company has operated its business in two business divisions, the Machinery business and the Environment business, and has disclosed financial results in the previously mentioned two business segments. However, as of September 1, 2024, the Company has decided to integrate the Environmental business to the Machinery business and unify the business division. This is done to utilize human resources and improve organizational efficiency in order to further expand operations, strengthen the structure, and increase business value. Due to this change, the Company will only report the overall financial result and not in business segments.

On the other hand, since it is highly probable that the overall financial result alone is not enough information for investors to make decisions, therefore the Company has also decided to disclose the sales by product categories as supplementary information in the financial reports.

Before change (reporting business segments)

### **2. Schedule**

It will be introduced starting with the announcement of financial results for the first quarter of fiscal year 2025.
