Financial statements for the nine months of 2024

13-Feb 2025

Agenda

- 1. FY2024 Q3 Summary FY2026 Medium-Term Management Plan Progress
- 2. FY2024 Q3 Summary of consolidated financial results. FY2024 full-year forecasts, shareholder returns.

Appendix.

1. FY2024 Q3 Summary FY2026 Medium-Term Management Plan Progress

1Q-3Q FY2024 Summary

<Performance>

- Sales, gross profit, profits at all levels and profit margins reached to **record highs** as 3Q.
- *Consolidated Gross Profit Margin: First half FY2024 16.7% \Rightarrow 1-3Q 18.0% (3Q only \Rightarrow 20.0%)
- Orders and orders carried forward also reached a record high.

<2026 Medium-Term Management Plan Progress>

- Large-scale developed hydrogen generator adopted as green hydrogen production for industrial use.
- Promoting initiatives aimed at the transformation of the 'construction' process.
- Enhancement of recruitment, enhancement of training and other HR system updates (to be implemented from next financial year).

<Enhanced engagement with stakeholders>

- Continuing **branding activities** to promote work-style reform and improving the image of the industry.
- Continuing to strengthen partnerships with partners.

Medium-Term Management Plan (2023 to 2026) KGIs and KPI

(Revisions of 2026 Medium-Term Management Plan at 14 May 2024)

KGIs (FY2026)

Enhance earning power

Consolidated ordinary profit 30

30 billion yen

Improve capital efficiency

Consolidated ROE

Approximately 12%

Contribute to the global environment

Reduce CO₂ emissions(compared to FY2022)

•Scope 1, 2: -16.8%*1

•Scope 3: -10.0%*2

KPI

1. Enhance earning power based on our construction business

- Achieve a consolidated gross profit margin of 17.0% or more by improving our received-order profit margin and enhancing cost management
- 2. Establish business that will lead to long-term added value
- •Achieve the social implementation of green energy supply equipment (equivalent to a total of 5,000 kW*3)
- Propose a carbon transition of -15,000 tons of CO₂ per year

3. Invest in human capital, the source of our value creation

- •Increase the number of employees by 220 to 250*4
- Develop professional human resources
- •Reform our personnel management system Increase investment by 15 billion yen*3 through the above measures

*3 The total for the period covered by the Medium-Term Management Plan *4 Compared to FY2022 as of the end of FY2026

Measures implemented (Progress page)

- Construction Process Transformation T-Base® (P.5)
- Measures for Green Hydrogen Supply (P.6)
- The world's first hydrogen and oxygen generation on the Moon (p.7)
- Development of carbon-neutral technologies (p. 8)
- Strengthen recruitment activities, education and training
- DE&I promotion, etc.

^{*1} The reduction rate to achieve the 1.5°C target.

^{*2} The scope 3 reduction rate based on target in *1 above

Mid-term management plan KPI

1. Enhance earning power based on our construction business

2. Establish business hat will lead to longerm added value

3. Invest in human capital, the source of our value creation

To create businesses that lead to long-term added value.

Building a satellite T-Base®

Tohoku, Kansai, Hokuriku and Kyushu.4 sites started operations.

Preparedness for increased demand due to large projects, KOWAKAI* cooperation sites and production schemes. **name of association of cooperative companies*

Standardisation of construction, linking with BIM, etc.

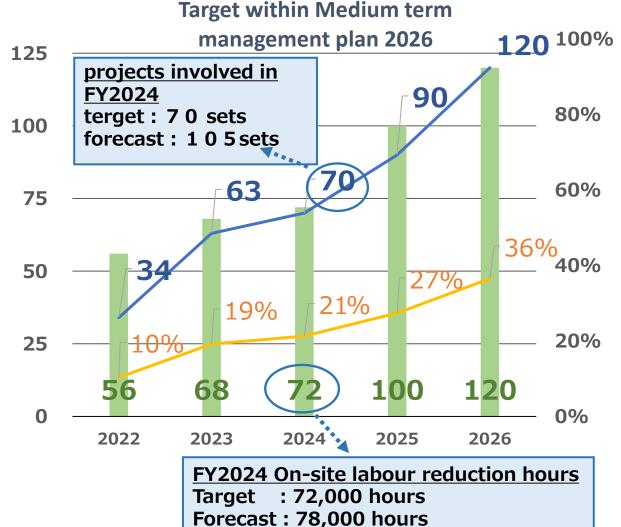

T-Base® Menu and BIM linkages creating mutual synergies

Contribute to the global environment

Less packaging disposal Implement measures to reduce environmental impact, in addition to the establishment of recycling schemes.

Mid-term management plan KPI

1. Enhance earning power based on our construction business

2. Establish business that will lead to longterm added value 3. Invest in human capital, the source of our value creation

To create businesses that lead to long-term added value.

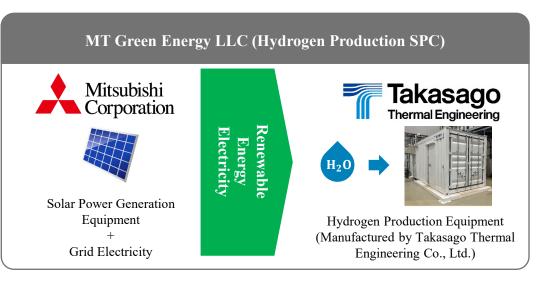

Initiative for Carbon Neutrality: Green Hydrogen Supply Demonstration Project Large-scale developed hydrogen production unit (100 Nm3/h) implemented.

Green Hydrogen

- In the beer production process, a large amount of steam is used to produce the unique aroma and bitterness of beer.
- Part of the fuel for the boiler that produces the steam is switched from city gas to green hydrogen.

Demonstration project at Kirin Brewery Hokkaido Chitose plant

Scheme of the Demonstration Project

Green Steam

Kirin Brewery
Hokkaido Chitose Plant

Joy brings us together

KIRIN

PRIME

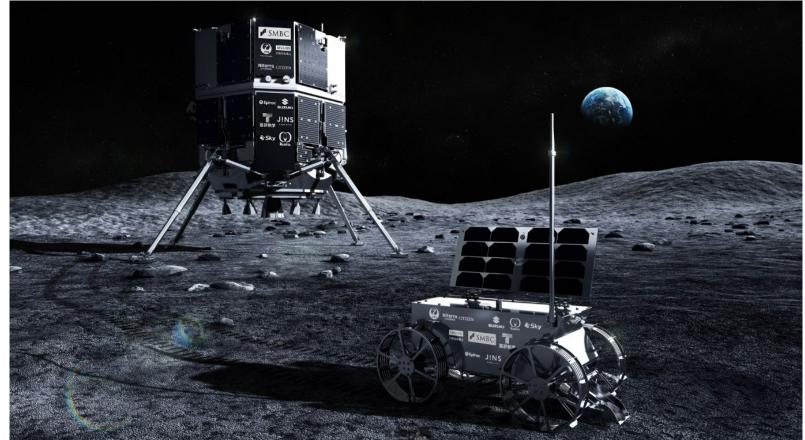

- 田搾り

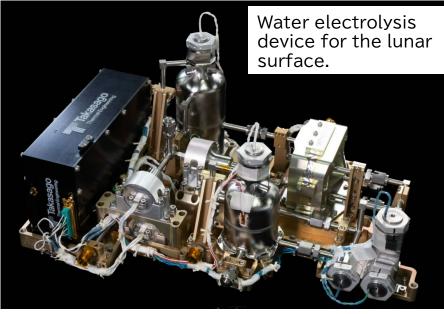

By utilizing steam derived from green hydrogen, it is expected to replace up to approximately 23% of the annual heat demand with hydrogen and reduce GHG emissions by 464 tons per year.

that will lead to long-

To create businesses that lead to long-term added value.

Sailing toward to the moon, creation of hydrogen and oxygen on the moon's surface.

- Completed the development of a flight model for a water electrolysis device designed for the lunar surface, which was successfully launched on January 15 by the space startup ispace.
- The device, mounted on the lunar lander, is on the route to the Moon.
 - Striving to achieve the world's first hydrogen and oxygen production on the lunar surface. ©Takasago Thermal Engineering Co., Ltd. 2024

Public viewing on 15-Jan-2025

To create businesses that lead to long-term added value.

Major awards (2024 Q3)

Energy Conservation Grand Prize, Energy Conservation Case Study Category, Director-General of the Agency for Natural Resources and Energy Award (business sector). Awarded for system reconstruction at the heat supply centre in the Makuhari New Urban Centre High-Tech and Business District.

Energy savings of 30% compared to previous levels were achieved. First heat supply facility in Japan to make full-scale use of treated sewage water. After acquiring and analysing performance data and identifying operational issues since the start of heat supply, and undertaking renewal work since 2016, primary energy efficiency was improved to the top level in Japan.

Cogeneration Grand Prix 2024, consumer use category, highest award 'President's Award'. Takasago Innovation Centre, combining renewable energy and storage batteries to achieve carbon neutrality.

In addition to solar power, wood biomass CHP* is used. And groundwater heat and large-capacity storage batteries were also combined, The AI-based EMS (Energy Management System) has enabled efficient operation of the facility.

* CHP => Combined Heat & Power System

Assessment of environmental performance.

Selected as 'A-list', the highest rating, in CDP 2024 Climate Change.

2. FY2024 Q3 Summary of consolidated financial results. FY2024 full-year forecasts, shareholder returns.

FY2024 Q3 Summary

As Q3, net sales and the profit at each level are at record highs as amount and %.

The amount of orders received, together with carried forward & continues to reach record highs due to the large amount of information for both the manufacturing and non-manufacturing sectors.

| (Unit: Million yen, %) | 3Q FY2023 | 3Q FY2024 | | | |
|--|------------------|------------------|------------------|------------|--|
| | Results | Results | Change | % | |
| Net sales | 263,732 | 265,193 | +1,461 | +0.6 | |
| Gross profit (Gross profit margin) | 42,759 (16.2) | 47,738 (18.0) | +4,979 (+1.8) | +11.6 - | |
| Operating profit (Operating profit margin) | 18,509 (7.0) | 20,925 (7.9) | +2,416 (+0.9) | +13.1 | |
| Ordinary profit (Ordinary profit margin) | 20,065 (7.6) | 22,902 (8.6) | +2,837 (+1.0) | +14.1 | |
| Profit (Profit margin) | 14,064 (5.3) | 16,621 (6.3) | +2,557 (+1.0) | +18.2 - | |
| | | | | | |
| Orders received | 283,857 | 316,826 | +32,968 | +11.6 | |
| Balance carried forward | 322,955 | 392,587 | +69,631 | +21.6 | |

♦ Net sales :

Sales in the 3Q were the highest ever, mainly due to the steady progress of construction work at the large-scale plants.

♦ Gross · Operating Profit :

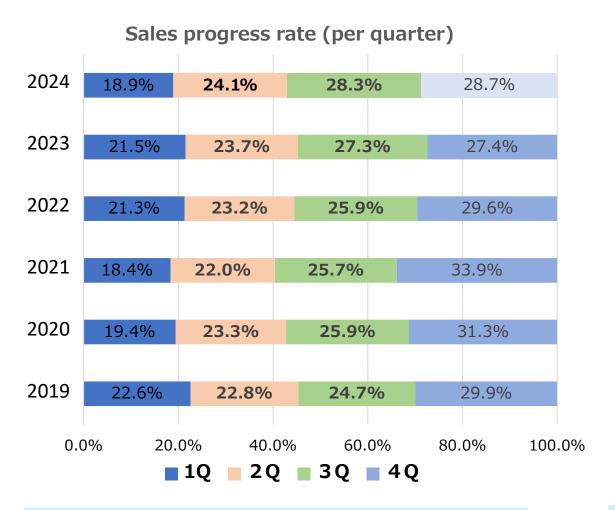

Profits and profit ratios at each stage reached record highs. The increase in SG&A expenses accompanying the implementation of the growth strategy was covered by efforts to improve profitability at the order and construction stages and other measures.

**Ref: 3Q non-consolidated gross margin 22.3%.

♦ Orders • Amount carried forward :

To meet strong construction demand and larger project size, we have developed a flexible construction and manpower structure, including the use of off-site construction, to promote systematic sales activities.

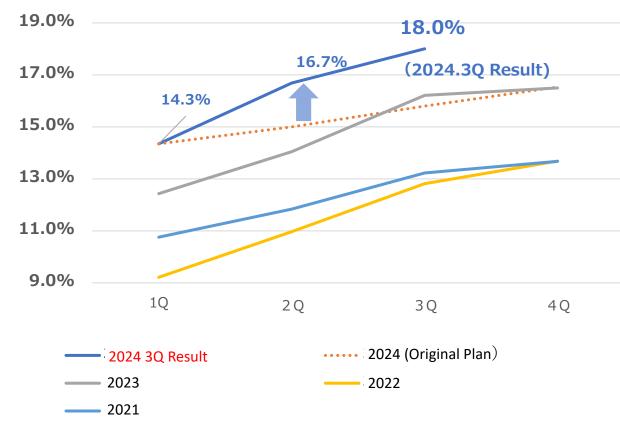

(Consolidate) Trends in quarterly sales progress rate and gross profit margin trends

Steady construction progress due to an efficient construction system has led to an increase in the construction progress rate. Consolidated sales of ¥105.2 billion in a single quarter were the highest ever as a single quarter.

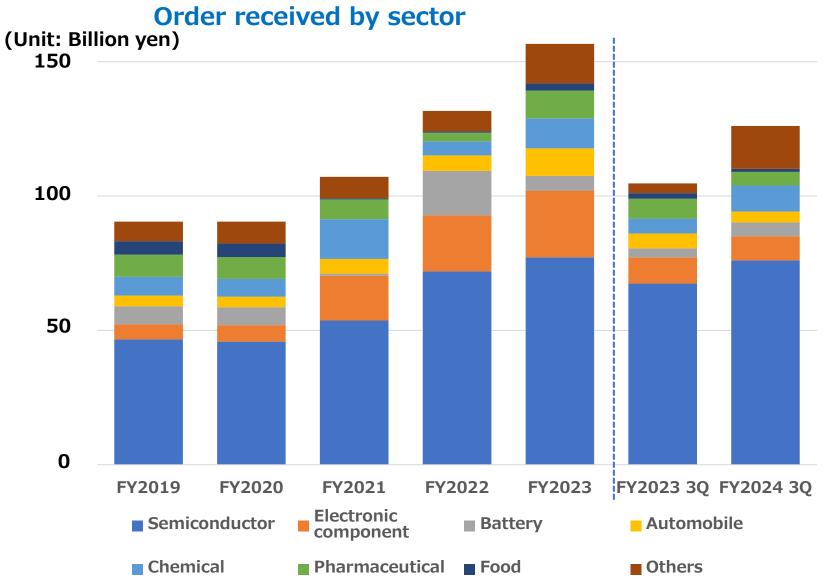

Quarterly gross profit margin trends

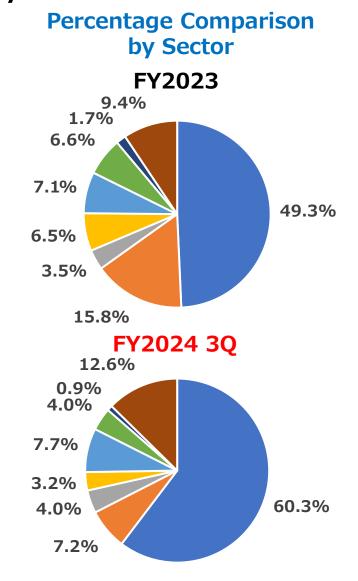

(Past 3 years trends and 2024 3Q results)

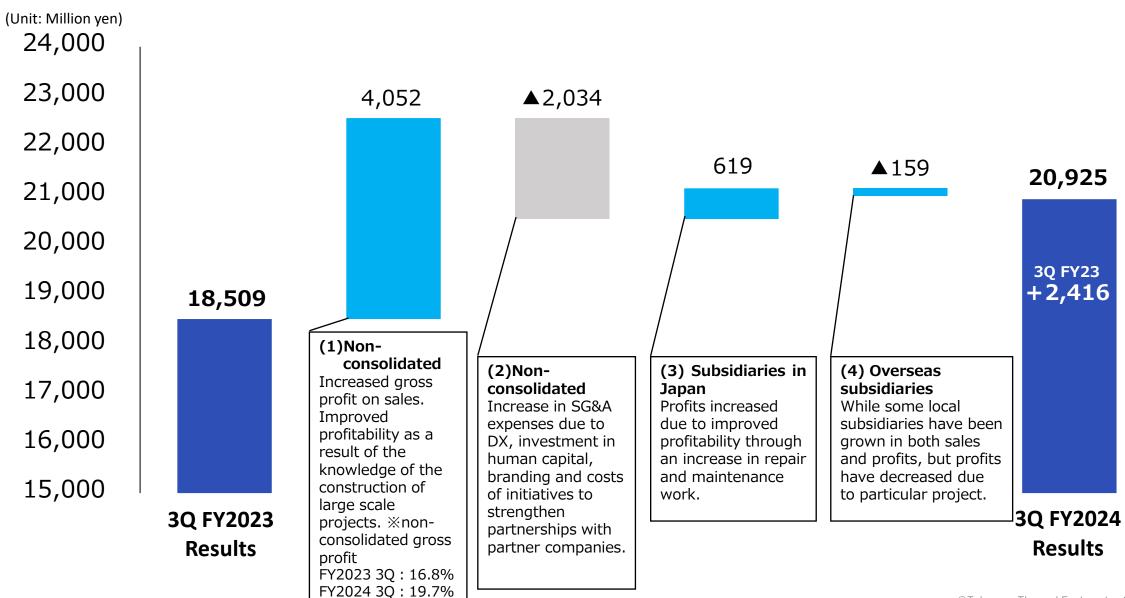

- Gross margin in 2024 Q3 will be higher than in the same period of the previous three years.
- The gross profit margin forecast for the full year 2024 \Rightarrow 18.1%.

(Supplementary Information) : Non-consolidated Industrial HVAC Orders Received by Sector

Major Components of Consolidated Operating Profit (YoY)

(Supplementary Information): International Business – By Region

Overview of 3Q FY2024

Sales: +27.6% YoY, mainly due to progress on large carried-forward construction projects.

Orders: +55.4% YoY, based on large amount of information, particularly in the industrial HVAC sector (semiconductor, pharmaceutical).

Balance Sheet (Vs. End of March 2023)

| (Unit: Million yen) | | End of Mar. 2023 | End of Dec. 2024 | Change |
|---------------------|----------------------------|---------------------|---------------------|---------|
| Current assets | | 248,386 | 248,858 | +472 |
| | Cash and deposits, etc. | 53,298 | 36,706 | △16,592 |

^{*2 =} Notes payable, payables for construction and electronically recorded obligations

Changes in cross-shareholdings

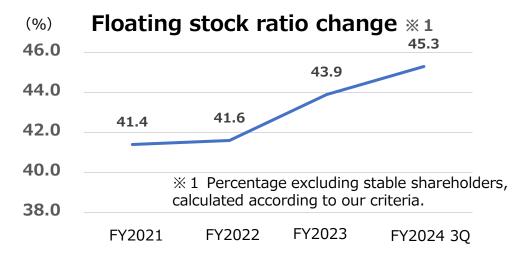

Changes in net asset ratio:

Investment shares held for purposes other than pure investment

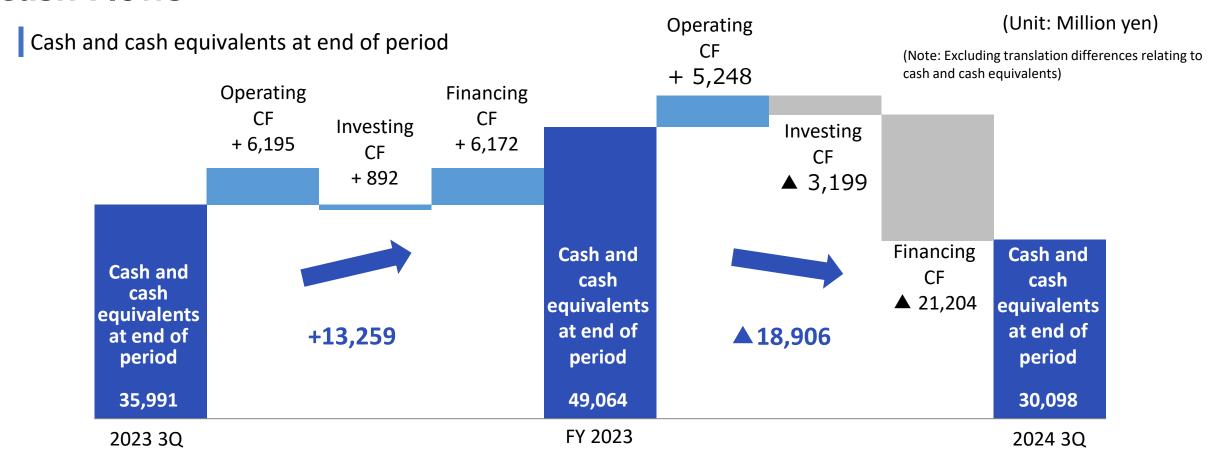

(Unit: M Yen)

| FY | 2019 | 2020 | 2021 | 2022 | 2023 |
|----------------|---------|---------|---------|---------|---------|
| Asset | 20.8% | 22.0% | 19.7% | 18.4% | 20.4% |
| Asset amount | 125,861 | 135,849 | 136,897 | 147,165 | 167,231 |
| Sales value | 2,866 | 1,791 | 2,278 | 1,148 | 2,268 |

During the period of the Medium-term Management Plan 2026 Contraction towards a net worth ratio of 15% or less.

Cash Flows

- ◆ Operating CF: The decrease in trade receivables exceeded the trade payables. Etc. + 5,248M-yen.
- **♦** Investing CF: Investment securities were sold but fixed assets and other assets were purchased. Etc. ▲3,199M-yen.
- ♦ Financing CF: Decrease in short-term borrowings, dividend payments and redemption of bonds. Etc. ▲21,204M-yen.

FY2024 full-year forecasts *1 Nov 2024 Revised forecasts (upward revision)

(Sales & Profit) It is expected to be increased by managing steady progress of large size project site work. In addition, company will work on improvement of profitability from planning stage through installation stage.

[Orders] Construction demand in the manufacturing and non-manufacturing sectors, mainly semiconductor-related on a non-consolidated basis, continues to be strong, and both consolidated and non-consolidated orders are same level expected from previous year.

Shareholder Returns

Dividends

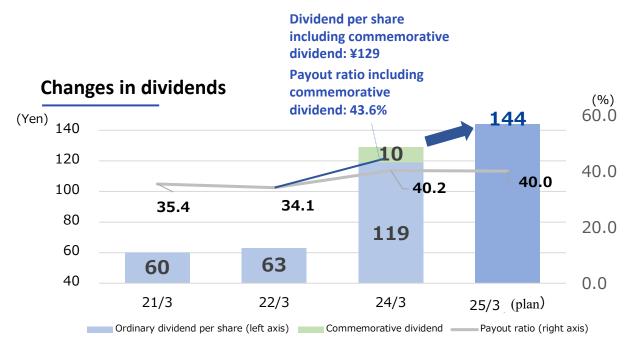

Interim dividend of ¥65, year-end ¥79, ¥144 full year. (YoY+¥25)

(X1 Nov 2024: Revision of dividend forecast due to upward revision of earnings forecast))

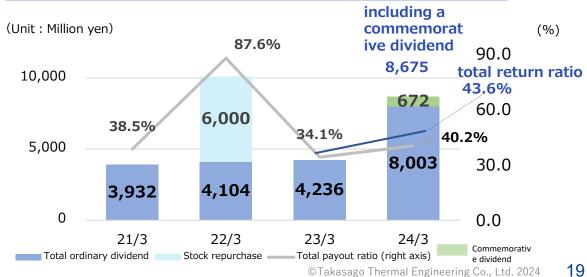

| | FY2022 | FY2023 | FY2024 |
|---------------------------|------------|--|--|
| | Results | Results | Plan* |
| Annual dividend per share | 63 yen | 129 yen Ordinary dividnd 119 yen Commemorative dividend 10 yen | 144 yen (interim dividend : 65 yen) |
| Net income per share | 184.69 yen | 295.68 yen | 360.00 yen |
| Payout ratio | 34.1% | Ordinary dividend 40.2% Including commemorative dividend 43.6% | 40.0% |

Basic policy for distributions to shareholders

The basic policy is to use dividends to distribute earnings to shareholders while maintaining the proper balance with funds needed for maintaining financial soundness and making investments for growth. The dividend is to increase with sustained growth of earnings while using a payout ratio of 40% as the guideline. Stock repurchases will be used for the medium to long-term growth of shareholder value. Repurchases will be conducted at suitable times while taking into account financial soundness, the efficient use of capital, current market conditions, the amount of equity, opportunities for business investments and other considerations.

Total distributions to shareholders (dividends and repurchases)
