From the perspective of sustainable growth and enhancing corporate value over the medium to long term, the Board has established the "Policy for Constructive Dialogue with Shareholders and Investors," and we will actively promote dialogue with shareholders and investors.

### (2) Planning and disclosure of business strategy & business plans (Principle 5.2)

【Action to implement management that is conscious of cost of capital and stock price】 【Last update: May 13, 2024】

In the "PERSOL Group Mid-term Management Plan 2026," aimed at enhancing corporate value, we have categorized our financial strategy into three areas and delineated specific objectives for each: "Key Financial Strategy Indicators," "Cash Allocation," and "Shareholder Returns."

Under Key Financial Strategy Indicators, we have established growth, efficiency, and stability metrics. For growth indicators, our target is to achieve an annual growth in adjusted EBITDA of  $\geq 10\%$ . Regarding efficiency indicators, we aim for ROIC  $\geq 15\%$  and ROE  $\geq 20\%$ , surpassing the benchmarks set in the previous Mid-term Management Plan for the entire group, while considering the varying business maturity levels across Strategic Business Units (SBUs) (both based on IFRS). Through this approach, our aim is to consistently surpass the Cost of Capital with our ROIC and continually enhance corporate value by implementing strategic business plans, capital policies, and initiatives to reduce the Cost of Capital, thereby widening the ROIC spread. Our Cost of Capital, typically acknowledged to be around 8%, is determined based on widely accepted calculation methods as well as insights gained through discussions with shareholders and investors. This Cost of Capital is generally fixed throughout the duration of the "PERSOL Group Mid-term Management Plan 2026," unless significant changes occur in the capital structure. The Board of Directors is briefed on the Cost of Capital status at least annually and adjustments are made as necessary. ROIC is incorporated as one of the factors to determine performance-based medium-and long-term incentive compensation for executive directors and corporate officers. Regarding stability indicators, we have set the Net Debt/Equity ratio at  $\leq 1x$  and the Net Debt/EBITDA ratio at  $\leq 2x$ , both from a stock and flow perspective. We believe these metrics will serve as financial discipline when evaluating and executing future M&A activities. Our Price-to-Book Ratio (PBR), a measure of market valuation, has consistently exceeded 1x, not only in the most recent period.

"Cash Allocation Policies" and "Shareholder Returns Policies" are unchanged basically, but the total post-tax adjusted EBITDA (JPY 200 billion in current mid-term management plan period through March 31, 2026) is expected to be revised downward accordingly to our downward revision of the earnings forecast announced in February 2024 due to the recent volatile changes in the business environment. As we recognize that shareholder returns are an important management issue, our policy in this medium-term management plan is to set the dividend payout ratio at approximately 50% of adjusted EPS. In addition, we will consider share buybacks as appropriate, based on the factors such as financial conditions and stock price. We are striving to optimize the balance sheet and enhance capital cost management by avoiding excess capital

and cash.

Moreover, from the perspective of sustainable growth and long-term corporate value enhancement, we have established a "Policy for Constructive Dialogue with Shareholders and Investors" at the board of directors, actively engaging in discussions with them. An overview of the implementation status is available on our company's website.

As a result of the verification, we have sold some of the shares that were determined to have no significance in holding.

In a bid to further enhance the oversight function of the board, the Company annually evaluates overall board effectiveness and discloses the method and process of evaluation and a summary of the evaluation results.

For the evaluation of the effectiveness of the Board in FY2024, we used the insights generated from the external evaluation conducted in FY2022 using a third-party evaluator. This evaluation involved a self-evaluation questionnaire targeting all directors, individual interviews with each director conducted by the Chairman of the Board, and a questionnaire distributed to the executive officers under its oversight. Following these discussions, we compiled the final evaluation results.

#### 2. Evaluation Method and Process

- (vii) Operation of committees (roles and composition of the three board committees, i.e., the Audit and Supervisory, Nomination and Compensation, and Corporate Governance Committees)
- (viii) Relationship with investors and shareholders (provision of information on the status of dialogue; supervision of the system for promoting dialogue)

(7) We put together the results of deliberations so far, reported them to the Board, and the evaluation by the Board was finalized. (May 2025)

### 3. Evaluation Results

Based on analyses of self-evaluation questionnaire surveys and director interviews, the Board held several discussions regarding its effectiveness. The Board observed that its composition, operation, culture and communication, discussion and oversight function, support systems, operation of committees, and relationship with investors and shareholders, ensured its effectiveness, particularly by facilitating open, constructive discussions that clarified key points.

In addition, in fiscal 2024, we achieved the highest rating of “AAA” in the MSCI ESG Ratings, a global benchmark for ESG investing, and received the “Tokyo Governor Prize” at the “Corporate Governance of the Year® 2024” hosted by the Japan Association of Corporate Directors. These external acknowledgments of our corporate governance further reinforce our belief that the effectiveness of the Board is well-established.

Additionally, the Board confirmed that proper efforts to address issues identified in the FY2023 effectiveness evaluation have improved its effectiveness. The Board also recognized future challenges that need to be addressed to further enhance its oversight function.

(1) Progress in initiatives to address the issues identified in FY2023 board effectiveness evaluation

(i) Clarification of growth strategies that contribute to improving corporate value and constructive dialogue with shareholders and investors

The Board has initiated discussions aimed at fostering a growth-oriented management approach by establishing an agenda that emphasizes long-term business portfolio strategies, initiatives in generative AI, and growth strategy themes that enhance corporate value, including “Career Well-being.” Furthermore, feedback regarding the Company's growth narrative, gathered through constructive dialogue with a diverse range of shareholders and investors, is consistently communicated by the management team to the Board. This practice fosters a positive cycle conducive to further management advancement.

Through this process, we have identified opportunities for improvement based on the specifics of our business portfolio in alignment with our medium- to long-term vision of our desired future state.

(ii) Appropriate oversight of business strategy (oversight for risks and opportunities)

The management team has increased the frequency of reports to the Board regarding the status of risk management. On a quarterly basis, the Board reviews the progress of various initiatives aimed at enhancing the Company's corporate value, as well as the status of the medium-term management plan. Additionally, discussions surrounding individual business investments have significantly aided in the discussion of risk tolerance.

Through these discussions, we have come to understand that to create and implement growth strategies that account for future developments, it is essential not only to avoid losses but also to take sound risks. Consequently, it is crucial to bolster and oversee our risk management system within a framework that incorporates risk appetite.

### (iii) Continuous improvement of the Board's operation

By appropriately utilizing preliminary briefings and board meetings, we minimized the need for explanations during board meetings, allowing us to focus more on discussion. This approach led to both more in-depth conversations and improved meeting efficiency. Additionally, ongoing enhancements in the quantity and quality of meeting materials, along with the implementation of an online simultaneous interpretation system, have further boosted the efficiency and effectiveness of our meetings. Given the limited time available, we understand that for the Board to engage in more productive discussions aimed at enhancing corporate value, it is essential to prepare meeting materials that clearly and concisely outline the issues for discussion. We are committed to continuously improving meeting management.

### (2) Issues recognized in the FY2024 effectiveness evaluation of the Board and direction of future efforts

#### (i) Discussion of growth strategies and business portfolios based on the Company's medium- to long-term vision of where it wants to be, and enhancing risk management

We confirmed the necessity of envisioning the medium- to long-term future of the Company and sharing this vision among the Board and management team to enhance the Company's corporate value. Accordingly, it was determined that the Board needs to discuss specific growth strategies and business portfolios that align with the Company's medium- to long-term vision. We also recognized that developing and implementing future growth strategies requires a framework for talking about prudent risk-taking. It is also important to enhance our risk management system by incorporating a framework that defines our risk appetite.

#### (ii) Appropriate monitoring of strategy implementation

We recognize that for the Board to effectively oversee the execution of growth strategies by the management team, it is essential to enhance mutual understanding among directors and between the Board and the management team regarding the scope and level of oversight. Therefore, we have determined that accurately assessing the status of growth strategy execution is crucial. In instances where discrepancies arise between plans and results, it is important to analyze the causes and implement additional measures as needed to achieve the Company's mid- to long-term vision.

#### (iii) Continuous improvement of the Board's operation

We acknowledge that the continuous improvement of the Board's operations—through enhancements to meeting materials and infrastructure—is crucial for facilitating in-depth discussions that aim to enhance corporate value. Additionally, we understand the importance of fostering a more profound understanding of the business by providing outside directors with opportunities to visit business sites as a prerequisite for meaningful discussions.

Based on these evaluation results, the Company's board will continue to promote the PDCA cycle to improve its effectiveness and drive governance reform, so as to enable the PERSOL Group to realize sustainable growth and enhance corporate value.

### (3) Training policy for Directors (Supplementary principle 4.14.2)

The company have positioned training for directors as an important mechanism to support our corporate governance. We conduct two types of training: "on-boarding training" when assuming office and "ongoing training" thereafter.

"On-boarding training" shares basic information about the Company, which is a prerequisite for newly appointed directors to fulfill their supervisory functions. "Ongoing training" consists of updates on "roles and responsibilities of directors" and "the business environment outlook" which are prerequisites for directors to continue to fulfill supervisory functions after assuming office. The Company will bear any other costs necessary to provide appropriate individual training to directors.

In the FY2024, as part of the "on-boarding training" for one newly appointed director, we provided input on basic information on the "roles and responsibilities of directors" and the "the business environment outlook."

As part of the "ongoing training," we conducted a training session on essential laws and regulations for the HR services industry, such as the Worker Dispatching Law and the Employment Security Act, to update the "roles and responsibilities of directors." Furthermore, we provided opportunities to understand the "the business environment outlook" through site visits and discussions with executives of Strategic Business Units (SBUs), as well as sharing financial results announcements, corporate events, etc.

## 7. Sustainability initiatives

### (1) Sustainability initiatives (Principle 2.3, Supplementary Principle 3.1.3, 4.2.2)

The company believe that we must identify materiality (key issue) that is essential for sustainable growth, incorporate these issues into our business plans, and act accordingly to address sustainability-related risks and opportunities which are likely to impact our management policies, plans and other activities. The eight materialities set for FY2022 (Creating work opportunities, Providing diverse work styles, Providing learning opportunities, Increasing productivity in business, Active roles of diverse personnel, Strengthening data governance, Respect for human rights, and Responding to climate change) have been incorporated into the Mid-term Business Plan 2026. We have set targets and KPIs for 2030, and the entire group will work together to achieve them.

Our materiality process and monitoring efforts to address material issues are posted on our website:

<https://www.persol-group.co.jp/en/sustainability/materiality/>

### <Sustainability Policy>

Driven by our Corporate Philosophy of “Providing Opportunity, Individual Growth and Social Contribution,” the PERSOL Group works with diverse stakeholders to actively address social and environmental issues in the aim of building a sustainable society.

With appropriate governance, we will continue to engage in business that realizes our Group Vision, “Work and Smile,” and enrich society so that all work leads to lives of happiness.

Working for sustainability is posted on our website:

<https://www.persol-group.co.jp/en/sustainability/>

(2) Addressing climate change issues and disclosing information based on TCFD recommendations (Principle 2.3, Supplementary principle 3.1.3)

Regarding the issue of climate change, The Company has endorsed the recommendations of the Task Force on Climate-related Financial Disclosure (TCFD) and has started the disclosure of information about climate-related risks and opportunities for business based on scenario analysis from May 2022. The Company has also set a “Carbon-Neutral” target to reach zero greenhouse emissions in real terms from the energy used in our business activities by fiscal year 2030.

Through initiatives such as the promotion of energy conservation measures in the office and the use of renewable energy, we will strive to tackle the societal issue of climate change and achieve a carbon-neutral society. We will also consider setting additional carbon reduction goals that include scope 3 in or after fiscal year 2023.

Details is posted on our website:

### **8. Efforts for human capital investment**

(1) Ensuring diversity in hiring of core human resources (Principle 2.4, Supplementary Principle 2.4.1,3.1.3)

Upholding our group vision of “Work and Smile,” PERSOL is committed to driving “Diversity, Equity & Inclusion” (DEI), a core initiative in our mission to create a society where everyone can work and smile. Guided by the “PERSOL DEI SPIRAL” as our fundamental approach, we strive to understand and embrace all forms of diversity and harness diverse capabilities. We empower our group members to continuously enhance and develop their skills, enabling ongoing growth. Furthermore, we foster an

environment that promotes synergy by improving workplace conditions for all talent and integrating diverse abilities.

The human resource development policy of the group focuses on “working individuals” and respects their diverse values. It attaches importance to all employees’ continuing to grow autonomously and developing human resources who play an active part even under the present highly uncertain business environment. Under this policy, the group has been conducting DEI literacy training (e-learning; started in May 2019; a total of about 206,000 participants) and awareness reform training for all managerial staff (started in October 2021; about 3,200 participants). It also has been offering monthly in-house events to spread DEI to promote development of culture that accepts diverse attributes and values such as female participation, sexual minorities, and age difference (started in July 2020; held 84 times in total; about 12,600 applicants).

The in-house environment development policy is to develop a workplace environment that is friendly for all employees. The group is developing such an environment by introducing a side job system that leads to growth of employees, realization of their visions, and social contributions as well as flexible working time and liberalization of dress code as a rule aimed at realizing a comfortable workplace environment, while establishing systems and offering trainings to enable employees to select workstyle that addresses their respective needs. The group also leverages telecommuting and the level of its utilization differs from company to company: the highest utilization ratio is 100% and 60% of our group companies shows that at the employees utilize it at least once a week. Reflecting diversification of their human resources, some of the group companies have introduced systems to enable employees to flexibly select the number of working days, hours, and place as well as leaves in order to respond to individual employees’ various needs such as child rearing, nursing of elderly, seeking higher studies, studying abroad, hobby and leisure activities, community activities, social activities, and health issues.

The group also follows the approach to accept and leverage diversity in employees’ promotion to management, which is the core of its business activities, and promotes personnel irrespective of the category with which the employee joined the company, their gender, or their nationality.

We aim to achieve a female ratio of 30% among executive officers and 37% among employees in management positions by 2030. In the fiscal year 2024, the percentage of female employees in management positions for the group was approximately 27.6%, and this ratio has been improving year by year. In September 2021, the group established Gender Diversity Committee to accelerate its concerted efforts for further promoting female participation. The group also promotes foreign

employees to managerial positions based on the diversity concept irrespective of their nationality. Of about 790 foreign national employees of the group working in Japan, 20 have been promoted to managerial positions and the group intends to maintain the current level. The ratio of mid-career hires among employees in managerial positions exceeds 80% at group companies in Japan, and the group plans to maintain the current level, which is sufficient.

The group will continue to leverage viewpoints and values of its diverse human resources throughout the group thereby sustainably growing itself.

See the company website for the group's diverse human resources and its policy for human resource development.
