2. Explanation of Dividend Policy

dip considers income distribution to shareholders to be one of its most important management responsibilities. We pay a regular dividend twice per fiscal year (an interim dividend and a year-end dividend) while maintaining the internal reserves necessary to invest in the future growth of the company and to address changes in the business environment. In principle, dip uses the previous term’s dividend as the lower limit and a dividend payout ratio of 50% as a guide in determining dividend payments.

Based on the above income distribution policy, we will pay a year-end dividend of ¥48 per share for FY'26/2.
