Regional BWA is a radio system for telecommunications services designed to contribute to promoting regional and public welfare, such as enhancement of public services in the local community and elimination of digital divide (disadvantaged areas), by using radio waves of dedicated frequency bands allocated to each mobile telecommunication service operator.

In the future, while utilizing this regional BWA, in cooperation with Suwa City, we will promote the provision of services that contribute to the local community, such as the provision of images of river surveillance cameras. We also plan to provide high-speed wireless broadband service for general users.

We will strengthen the role of core infrastructure providers in the region and actively work with local governments and local companies to establish trust and status as a company that improves the quality of life of people.
