Consolidated Financial Results Supplementary Document Q2 FY20

November 4, 2020/ SIGMAXYZ Inc. (Stock Code: 6088)

Outline of Financial Results for Q2 FY20

Summary			(YoY change)
	Consolidated revenue	6.74 billion yen	(-13%)
	Profit before income taxes	777 million yen	(-22%)
	Profit	366 million yen	(-41%)

- Despite a growth in the ERP cloud migration services, revenue decreased affected by decreased revenues from consulting services for the aviation industry, which has been severely affected by the COVID-19 pandemic, and from product sales due to a phased scale-down of the procurement of hardware and software products on behalf of clients, a service that is ancillary to call center projects in the retail industry and has contributed only marginally to profit.
- By the reassignment of consultants from aviation industry related projects to other projects, revenue from consulting services, other than from the aviation industry and product sales, increased from Q1.

Consolidated Income Statement for Q2 FY20

Topics: Migrating ERP to the Cloud

In readiness for the situation called the "2025 Digital Cliff," when the existing ERP maintenance support expires, SIGMAXYZ supports clients to enhance their corporate value by smoothly migrating their ERP to a cloud environment, and carries out organization/business transformation and change management, based on the growth scenarios for clients that we provide.

As of September 30, 2020, the number of consultants with SAP S/4HANA® Cloud certifications, who oversee its ERP cloud migration services projects, has increased to 43. We are a leader in the industry in terms of the total number of certifications acquired.

Customer example CUSTON TTAT SAP Award of Excellence 2020 "Project Award" winning project SIGMAXYZ supported the NTT Advanced Technology Corporation's core IT system reform project, and completed the migration of key systems to the cloud in about six months. The project used SAP S/4HANA Cloud's multi-

tenant edition, which is SAP's next-generation

package. It was the first time multiple modules

(financial accounting, management accounting,

project management) were implemented all in

one to go for a Japanese company's domestic

operations. (As of June 2019)

sales management, purchase management, and

cloud ERP (Enterprise Resource Planning)

Digital Transformation of Indirect Operations

SIGMAXYZ Inc. has achieved complete digitization of expense settlements and invoice management for indirect material purchases. Based on the knowledge we have gained from this, we have started providing a service for the "digital transformation of indirect operations."

In order to promote this service, we have developed solutions and partnerships, utilizing various types of SaaS, including Concur. Aiming for nationwide market expansion.

Image of process innovation with DX for expense settlement in the company Use of expenses to expense applications Check (approval) + audit Before DX Manager's Accounting Compliance Cash Paper receipt Manual input approval approval check API Compliance Receipt reading Concur expense inter-AI-OCR action DX Transform operational processes Elimination of Automatic acquisition of paper vouchers centering on audits expense data Stop submission Stop inputting expense Stop manual approvals and storage settlement information manually

- Reduced the number of man-hours by 28% per employee
- Eliminated manager's approval process (average of 120 minutes per month)

Customer example

We assisted SHIONOGI & CO., LTD. in introducing an operational process and cloud services for expense settlements—both which comply with the Electronic Books Storage Act, and achieved complete digitization of the expense settlement process, including digitization of its vouchers. We completed the introduction of the new operational process and its system for all 5,000 employees in 10 months.

Nikkei Computer (issued on April 18, 2019)

Digital Workplace Environment

Since its inception in 2008, SIGMAXYZ has developed and maintained a digital workplace environment based on strict security policies.

The aim is to provide employees with the freedom to choose the time and location that best suits their value creation activities. Through the following environment and mechanisms, we will use the digital platform in all areas related to business operations, and develop business activities that are independent of office work.

- Access to digital and mobile tools for all employees
- Digital distribution of internal information and paperless operations
- Use of collaboration tools such as web conferencing and business chat systems
- Process various internal operations such as expense settlement digitally
- Use real-time operation management system to visualize operations
- Skill-based human capital evaluation system
- Office operations via company-wide free address system

Presenting Information as a Leading Company in Food Innovation

We have participated in government-led workshops as a core member. We have also received media coverage, and provided information through lectures, contributions, and publications.

In July 2020, consultants in this field published the first food business book in Japan, "The Food-Tech Revolution", in which they thoroughly detail how "food" acts in the era of COVID-19 and post COVID-19, and the cutting-edge food business.

- ✓ "The Future of Food Tech 2019-2025" (Nikkei BP, 2018)
- √ "Food Tech Revolution" (Nikkei BP, 2020)

Enhancing Non-financial Value (SDGs and ESG initiatives)

We believe that the value of a company is a synthesis of financial and nonfinancial value, and place importance on Sustainable Development Goals (SDGs) and Environmental, Social and Governance (ESG) factors in promoting our business.

SDGs

We strive to expand value-added activities to address social problems as well as our clients' issues.

On commencement of the project, a forum for consensus building is set up with the client concerning which items pertaining to the SDGs' 17 goals are to be achieved, and how.

ESG

We have implemented paperless internal information sharing processes*, and have stopped offering beverages in PET bottles and switching clear folders made of plastic materials to paper-based ones in our business premises.

(*Monthly number of copy/print paper used per employee for the fiscal year ending March 31, 2020 : 160 sheets [12% decrease from the previous year])

- We are working on building a "social multi-sided platforms" to form an ecosystem where people in Japan and overseas who empathize with and support our initiatives gather to address social issues. As a part of these initiatives, we have concluded the "Comprehensive Partnership Agreement for Achieving Next-generation Infrastructure" with Obuse Town (Nagano prefecture) in September, 2020.
- With regard to the corporate governance system, the ratio of independent outside directors is 58%, and all of the members of the Audit & Supervisory Committee and the Compensation Committee are outside directors. 10

Alliance Business

We offer support in the form of a joint venture, providing human capital and funds to address customers' business challenges.

The "contingent fees" for solving the issues are gained from the profit earned by selling shares. Depending on the purpose of investment and voting rights ratio, the fees are included in the calculation as operating income or extraordinary income in accordance with accounting standards.

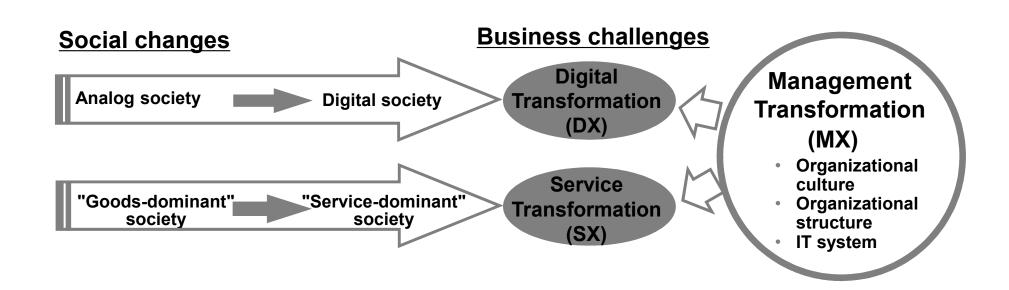

- Extraordinary income came to ¥146 million due to the sale of the Company's entire stake in Lawson Digital Innovation Inc. to Lawson, Inc. in April 2020.
- Lawson Digital Innovation is a joint venture established in 2016 primarily for the purpose of promoting the digitalization of the Lawson business. We sold our stake in the company as we achieved the intended purpose.

Our Digital Transformation: Three Innovations

1) Digital Transformation (DX)

Streamline existing business operations

- 2) Service Transformation (SX)
- Create new value
- 3) Management Transformation (MX)
- Management platform reform

SIGMAXYZ's Business

In response to the various business challenges that companies face, SIGMAXYZ provides consulting services in a wide range of fields, and launches and operates related forms of business.

In addition, we aim to promote value creation activities that go beyond the boundaries of a single company or industry, by forming an ecosystem through networks with a diversity of professionals and companies.

FY20 Consolidated Earnings Forecasts

Unit: Million yen	FY 20	Increased/decreased amount to the previous fiscal year	Increased/decreased rate to the previous fiscal year
Revenue	14,500	-1,503	-9%
	to 15,500	to -503	to -3%
Profit before income taxes	1,750	-426	-20%
	to 2,350	to +173	to +8%
Profit attributable to owners of parent	1,050	-357	-25%
	to 1,520	to +112	to +8%

Revenue: Disclosed a range of amounts instead of a specific value because it includes product

sales of hardware and software procurement services for call center projects in the

retail industry.

Profit: Since capital gains and earnings from business investments, which are similar to

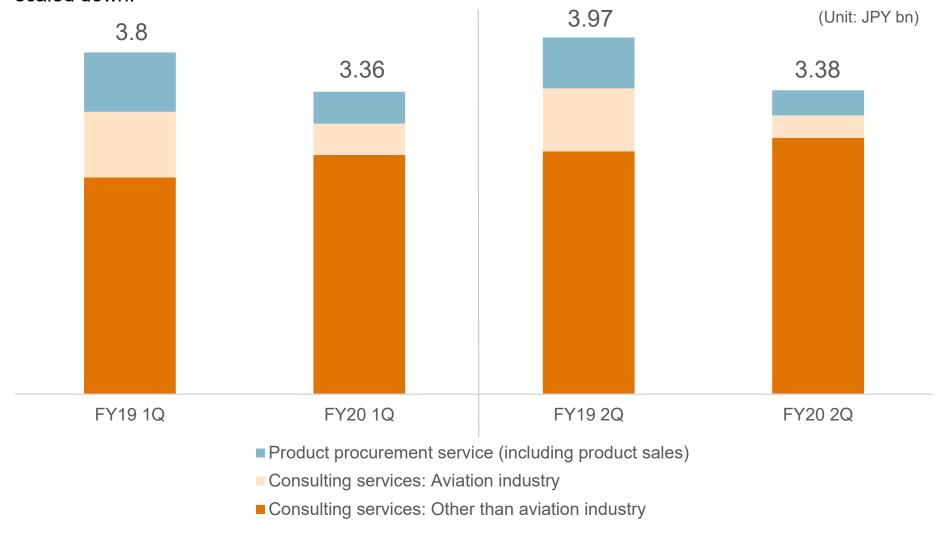

contingency fees, may be special profits for accounting purposes, the ordinary profit

will remain pending, and we will disclose a range of amounts of the profit before

income taxes and profit attributable to owners of parent.

(Reference) Revenue by Category

- In 2Q FY20, by shifting the consulting services from projects in the aviation industry to other industries, revenue increased from Q1 for consulting services excluding the aviation industry, product procurement services, and product sales.
- Hardware and software product procurement services, which is not our core business, will be gradually scaled down.

Dividend Policy

- Focus on striking a balance between shareholder returns and internal reserves, in order to strengthen the financial structure and prepare for future development of business.
- Ensure consistent and stable payment of dividends.
 - The dividend per share for FY20 : JPY 22.
